

RAVEN TECHNOLOGIES DIVISION (IOSA)

ravenadvisory.com

Business Unit 2

- Skills To Survive -

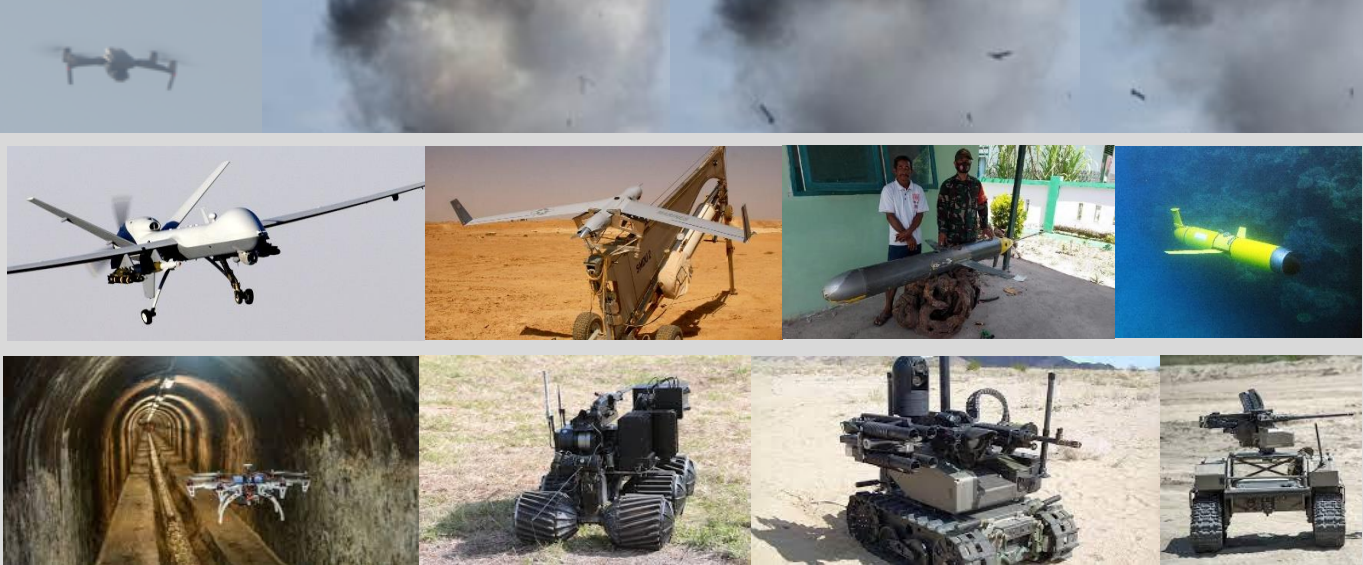

Raven Technologies Division provides training and operational integration for **Unmanned Systems, Counter Unmanned Systems, Robotic Autonomous Systems, CQB Drones, Subterranean Technology, and wearable systems** for defensive and offensive operations. These programs integrate emerging technology and systems into training scenarios designed to increase situational awareness, identify and refine the most effective integration techniques, and highlight capability gaps. Raven can also qualify personnel in FAA Part 107. Due to its proximity to the Laurinburg / Maxton Airport, Raven's Gryphon Group training facilities are unmatched for real world UAS/cUAS training scenarios.

Counter UMS

- Handheld
- Manpack
- Vehicle Mount
- Static Mount

Equipment Agnostic – Solution for the Problem – Multi-Dimensional Integration
